FORM CIR-2 (10-24-2002)

DEFINITIONS AND SPECIAL INSTRUCTIONS

1. Scope of this survey

This survey covers the production of yarns spun from staple, tow and uncut top, and the production of stretch, textured, crimped, or bulked filament yarns. Producers and contractors of textured yarns and filament are included in the scope of this survey. Producers of manmade fibers that are extruded into filament without further manufacture are not included.

2. Figures to be reported

Companies with more than one establishment manufacturing the products covered by this survey are requested to complete a separate report form for each location. If you have not received a separate form for each of your establishments, please call the contact shown on the report form or write to the U.S. Census Bureau for additional forms.

Separate reports should be filed for each establishment, for yarns spun on:

- Cotton system (including open end)
- Woolen system
- Worsted system (including American)
- Other systems

If our records indicated that you use more than one system of spinning, separate report forms have been sent to you for each system.

a. Unit of measure

Report all figures in thousands of pounds.

b. Columnar structure of report

This survey requests separate data for yarn that is produced for sale (Section I), produced for own use or on commission (Section II), textured for resale (Section III), or textured for own use or on commission (Section IV).

When posting your figures to the report, please be sure to report the total and distribution information in the correct columns.

SECTION I AND SECTION II — PRODUCTION OF SPUN YARN

- Column 1** — Total yarn production
- Column 2** — Weaving yarn
- Column 3** — Machine knitting yarn
- Column 4** — Carpet and rug yarn
- Column 5** — All other yarn

SECTION III AND SECTION IV — PRODUCTION OF TEXTURED, CRIMPED, TWISTED, OR BULKED FILAMENT YARN

- Column 1** — Total yarn production
- Column 2** — Weaving yarn
- Column 3** — Machine knitting yarn
- Column 4** — Carpet and rug yarn
- Column 5** — All other yarn

For purposes of this report, classify sliver or roving as yarn if it is produced for consumption without spinning.

3. Definitions

Textured, crimped, twisted, or bulked filament yarns — Includes yarns made by the air jet method, false twist principle, the conventional twist method (twist and detwist procedures), the stuffer crimp method, the filament loop method, and the other methods or combinations of methods used to texture filament. Yarns that are thrown only are excluded.

For sale — Shipments to other companies not affiliated with the yarn producing company.

For own use — Yarns consumed at the spinning plant or in other plants under the same or affiliated ownership.

On commission — Shipments of yarns made from fibers owned by other companies that are not under the same ownership or affiliated with the yarn producing plant.

Blends and mixtures — Spun yarn made from more than one fiber is classified according to whether the yarn is chiefly cotton or manmade fiber by weight. Yarn which is more than 36% wool by weight is classified as wool. As examples, a yarn which is 55% cotton and 45% rayon should be classified as chiefly cotton; a yarn which is 40% cotton, 30% rayon, and 30% acetate should be classified as rayon and/or acetate blended yarn.

Blends and mixtures which are by weight 50% manmade fiber and 50% natural fiber, should, for purposes of continuity, be classified in the manmade category. As an example, a yarn which is 50% polyester and 50% cotton should be classified as blends chiefly polyester.
